FRAGRANCES

BORN FROM TRAVELLING

Travelling changes us, awakens our emotions, gives us inspiration and fills our lives with new memories.

Some places stay with us forever – in the sound of the waves, the golden rays of sunset, the scent of blooming gardens and the warmth of the hot air of summer evenings. We store these moments not only in our memories, but also in smells that can transport us there in an instant.

This is how Voyage Collection was born – a collection of perfumes inspired by the most picturesque corners of the world, which are captured in exquisite perfume compositions.

Each fragrance of the collection is a small journey encapsulated in a bottle, a ticket to the world of exciting experiences, where each note tells its own story.

And the design of the bottles makes the collection special. They are like elegant souvenirs brought back from faraway travels, which you can collect in your unique Voyage Collection.

Tuscany is not just a place on the map, but a special state of mind, a state of lightness and harmony. Here time seems to slow down, the air is filled with aromas of blooming gardens, sea breeze and fresh citrus. This feeling of carefree Italian summer is the basis of Tuscany fragrance.

It is a light, fresh and radiant fragrance filled with sunny lemon coolness, jasmine tenderness and warm woody notes with soft sweetness.

Tuscany is created for those who are in love with summer, freedom and the atmosphere of southern cities.

SKINCARE STEPS

STEP	PURPOSE
CLEANSING	Removes impurities, make-up and sebum. Prepares the skin for the next stages of care. Without quality cleansing, the active components of other products will not be able to work to their full potential.
TONING	Restores the pH balance of the skin, moisturises, helps active ingredients to penetrate deeper. This step reinforces the action of the serum and cream.
CONCENTRATED CARE	Contains a high concentration of active ingredients. It works topically: helps to fight wrinkles, dryness, pigmentation, dullness. It is selected individually according to the needs of the skin. Important: the serum should always be used under the cream – this seals" the assets inside the skin and enhances the result."
BASIC CARE	This is a must-have step in your daily skincare routine, regardless of age or skin type. Day cream usually has a lighter texture. It absorbs quickly, does not overload the skin and provides protection from external factors. Night cream is more dense and rich in texture. It works at a time when the skin is actively repairing itself – during sleep.
EYE CARE	The skin around the eyes is delicate and sensitive and therefore requires special delicate care. Special products reduce puffiness, dark circles and prevent wrinkles.
ADDITIONAL CARE: PEELING	1-2 times a week, after cleansing and before toner. Improves skin texture, evens out tone, promotes cell renewal, and enhances the effectiveness of subsequent skincare products.

Comprehensive care is the key to healthy, radiant and youthful skin. Follow step by step - and each product will work more effectively.

Face ARCHITECT

WHEN INNOVATIONS IN CELLULAR COSMETOLOGY
CREATE THE ARCHITECTURE OF YOUTHFUL SKIN.

A premium skincare line designed for
the prevention and correction of age-
related changes. It strengthens the skin's
structure, enhances elasticity, evens out
tone, and refines micro-texture.

FACE
ARCHITECT
BY MIHI –
LUXURY THAT
WORKS ON
A CELLULAR
LEVEL

1 Exosomes — smart nanocapsules of youth

They transmit renewal signals to the skin and activate its natural self-recovery processes. As a result, collagen and elastin synthesis intensifies, the dermal structure becomes stronger, and the skin appears firmer, smoother, and more radiant. A gentle yet powerful inner lift — a true restart of the skin's internal reserves.

2 A next-generation biotechnological peptide, similar to the snake venom peptide Temple Kufia — a "botox effect" without injections

A next-generation peptide inspired by the venom of the Temple Viper. It blocks excessive nerve impulses, relaxing facial muscles so expression lines become less visible and contours appear more defined. This peptide doesn't "freeze" the face — it restores the skin's natural smoothness and serenity.

3 Spicules — micro-stimulation and renewal

Microscopic needles derived from marine sponges, used in professional cosmetology.

They gently penetrate the upper skin layers, creating micro-channels for active ingredients and triggering regeneration. Spicules act as skin activators — improving microcirculation, stimulating collagen production, enhancing firmness, and refining the skin's surface.

BIOTECHNOLOGICAL BALANCE

Each formula is enriched with bakuchiol, centella asiatica, and nourishing oils of shea, soy, avocado, and babassu. They nourish, protect, and amplify the performance of high-tech actives, providing comprehensive restoration and rejuvenation.

YOUR SECRET BEAUTY WEAPON FOR AN ATTRACTIVE AND RADIANT LOOK

The basis of all our patches is an innovative combination of plant cellulose, gum and unique red algae (Irish moss). This unique composition makes our patches not only effective but also environmentally friendly: they dissolve easily in water after use, minimising the impact on the environment.

Irish moss is the basis of hydrogel patches and at the same time their active component. It has remarkable properties of rejuvenating, softening and revitalising the skin; protects it from moisture loss by improving its microcirculation; saturates the skin with minerals and vitamins. Combined with other active ingredients, it creates a powerful complex to support the health and beauty of your skin.

A woman with blonde hair is applying blue hydrogel eye patches under her eyes. She is holding a black jar of 'mihi (care) HYDROGEL eye patch' in her left hand. A hand is pointing to the jar with the index finger. The background is a plain, light-colored wall.
