SKINCARE STEPS

STEP

PURPOSE

CLEANSING

Removes impurities, make-up and sebum. Prepares the skin for the next stages of care. Without quality cleansing, the active components of other products will not be able to work to their full potential.

TONING

Restores the pH balance of the skin, moisturises, helps active ingredients to penetrate deeper. This step reinforces the action of the serum and cream.

CONCENTRATED CARE

Contains a high concentration of active ingredients. It works topically: helps to fight wrinkles, dryness, pigmentation, dullness. It is selected individually according to the needs of the skin.

Important: the serum should always be used under the cream - this seals "the assets inside the skin and enhances the result."

BASIC CARE

This is a must-have step in your daily skincare routine, regardless of age or skin type. Day cream usually has a lighter texture. It absorbs quickly, does not overload the skin and provides protection from external factors. Night cream is more dense and rich in texture. It works at a time when the skin is actively repairing itself - during sleep.

EYE CARE

The skin around the eyes is delicate and sensitive and therefore requires special delicate care. Special products reduce puffiness, dark circles and prevent wrinkles.

SPF PROTECTION

Ultraviolet exposure is the main cause of premature skin ageing. SPF products protect against photo-aging, pigmentation and dehydration. They are a must at any time of the year.

ADDITIONAL CARE: PEELING

1-2 times a week, after cleansing and before toner. Improves skin texture, evens out tone, promotes cell renewal, and enhances the effectiveness of subsequent skincare products.

Comprehensive care is the key to healthy, radiant and youthful skin.
Follow step by step – and each product will work more effectively.

COMBI SKIN

PERFECT BALANCE: MATTE WHERE YOU WANT, HYDRATED WHERE IT MATTERS

It is an expert care that takes into account all the peculiarities of combination skin, returning it to freshness, firmness and healthy appearance. The active formula of the products stimulates natural regulation mechanisms, helping the skin to maintain optimal balance on its own.

The key feature of the series is a combination of lactobacilli and prebiotics, which effectively balance combination skin: control sebum production in the T-zone while preventing dryness in other areas.

AWAKENING THE DORMANT ENERGY OF YOUR HAIR

Give your hair a second chance. The enhanced Cannabis line is a synergy of nature and science designed for hair tired from stress and dryness.

Natural shield
100% natural hemp oil envelops each strand, restoring elasticity and protecting it from external aggressors.

Architecture of shine
An amino acid complex works like a "smart cement," filling damaged areas of the cuticle. The result — hair that radiates with health.

The updated formula is enriched with a hydrolipid complex, wheat proteins, and laminaria extract for even more effective hair restoration and strengthening.

Mihi Hack 

“Glossy finish”:
always rinse your
hair with cool
water at the end.
This “locks in” the
cannabis oil and
creates a mirror-
like shine.

-  Detox series based on bamboo charcoal for deep cleansing of hair and scalp.
-  Gives an amazing feeling of freshness, cleanliness and lightness to the hair for a long time.
-  Bamboo charcoal is a powerful adsorbent that removes toxins and various impurities: residues of styling products, excess sebum, silicones, city dust, smog, etc.

Mihi Hack

Leave the shampoo on for 1–2 minutes before rinsing. This gives the charcoal time to "absorb" all accumulated toxins and styling residues.

THE ARCHITECTURE OF LUXURY FOR YOUR HAIR

Feel the power of premium care where every detail is perfected.

Hair Architect Repair is a collection created for those who choose only the best.

Together, the shampoo and balm create a ritual comparable to professional treatments in the finest salons. After just one use, hair gains density, silkiness, and mirror-like shine, while with regular care it becomes strong, elastic, and protected from damage.

The unique composition of the series:

- ☑ Amino acid cocktail for deep repair and color protection.
- ☑ Plant-based keratin analogue from wheat and soy for density, strength, and salon-like smoothness.
- ☑ Trehalose — a rare antioxidant that preserves shine and elasticity.
- ☑ Lactic acid for flawless smoothness and radiant gloss.

Mihi Hack

Leave the foam on for 2 minutes before rinsing — give the "building blocks" time to bond.

Mihi Hack

For a "salon effect," comb through your hair right after applying the balm. This helps keratin and acids seal the cuticles perfectly, creating a mirror-like shine.

MYTHOS

Mythos is a fragrance inspired by the grandeur and aesthetics of Ancient Greece. It transports you to a world where legends come to life. This is the olfactory incarnation of a modern goddess: confident, radiant, and irresistibly beautiful.

The composition opens with the sparkling freshness of lemon, seamlessly flowing into an exquisite heart of orange blossom and decadent praline. A final accord of sensual vanilla envelops the skin in a soft, noble trail. Mythos is the scent of divine beauty.

TUSCANY

Tuscany is not just a point on a map; it is an anticipation of happiness. It's that moment when time stands still in the shade of blooming gardens, and the air is filled with sea salt and ripe citrus.

The Tuscany fragrance is woven from sunny lemon coolness, fragile jasmine, and noble cedar with a barely perceptible sugary sweetness. It is a manifesto of freedom and the carefree spirit of southern cities. Light, radiant, and truly alive – it was created for those in love with summer.
