WHAT CHALLENGES DO WE FACE AFTER THE AGE OF 35–40?

mihi | PEPTIDE
MATRIX

"SLEEPY" SKIN

Have you noticed that pillow marks take longer to fade in the morning, and your skin isn't as firm as it used to be?

MIMIC WRINKLES

The fine lines around the eyes and on the forehead are becoming more noticeable and no longer disappear after applying a regular cream.

WEAKENED BARRIER

The skin reacts more sensitively to temperature fluctuations, wind, hard water, and stress; it becomes red more often and loses moisture (high TEWL).

WHY A REGULAR CREAM IS NO LONGER ENOUGH?

Standard skincare only addresses the surface. Mature skin needs a comprehensive anti-aging booster that simultaneously delivers signaling molecules to cells, relaxes micro-tension, and reinforces the skin's protective mantle.

PEPTIDE MATRIX: THE THREE VECTORS OF YOUR SKIN'S YOUTH

The updated PEPTIDE MATRIX line offers a comprehensive, physiological approach to 40+ skincare.

Suitable for all skin types, especially skin
showing visible signs of aging—such as
loss of firmness, dehydration, reduced
density, and the appearance of wrinkles.

PRECAUTIONS

It is not recommended to use the product
during pregnancy or breastfeeding.

MAIN INGREDIENTS

MATRIX

PALMITOYL TRIPEPTIDE-1

An effective next-generation signaling peptide designed for comprehensive anti-aging skin support.

How it works:

It works as a component of anti-aging care, helping the skin appear firmer, denser, and more elastic.

Maintains a visible anti-aging effect, contributing to a smoother skin microrelief.

The result for your skin:

The skin becomes more nourished, deeply hydrated, and plump. Its firmness is noticeably improved, its texture is smoothed, and the complexion becomes more even, fresher, and radiant.

PDRN

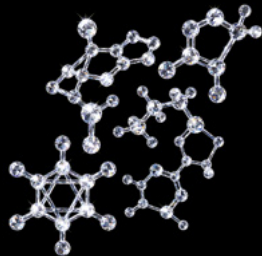

Unique biocompatible DNA molecules of plant origin. This is the “gold standard” in supporting skin regeneration. It acts as a smart anti-aging support for the skin, helping to maintain moisture and elasticity.

How it works:

It acts as a source of nucleotides for the skin and provides biotechnological support during the aging process. It helps maintain the skin's natural renewal process.

The result for your skin:

Skin density and elasticity are improved. The appearance of wrinkles is reduced, while the skin gains a healthy, fresh look and recovers faster from daily stress.

LIPID COMPLEX & BETA-GLUCAN

The combination of physiological lipids (ceramides, phytosphingosine, and cholesterol) and the natural polysaccharide beta-glucan soothes the skin, helps restore the skin's natural lipid barrier, helps retain moisture and protect the skin from external factors, reducing feelings of dryness, flaking, and sensitivity.
